

NOTICE Beware of Phishing Emails13/10/2020

We have received a worrying report from CERT-In that the phishing attack is expected to be carried out by cybercriminals using the suspicious email - ncov2019@gov.in.

"The cybercriminals are claiming to have a 2 million individual/citizen's email IDs and are planning to send an email with subject "Free COVID-19 TEST" inciting personal details from the residents of the following cities: Delhi, Mumbai, Hyderabad, Chennai, and Ahmedabad,".

If you get a mail in your inbox promising a free Covid test, it should raise red flags. This is a warning to Account holders that such mails that are landing in inboxes of unsuspecting account holders can compromise their accounts' safety and, in fact, be a carefully crafted phishing attack.

Any unusual activity or attack should be reported immediately at incident@cert-in.org.in with the relevant logs, email headers for analysis of the attacks and taking further appropriate actions.

Regards,
Shinhan Bank
